

In the Claims

Please add new claims 41-71 as follows:

Sub B1
41. (New) A machine-readable medium for use in interactive wagering on races that is implemented using a cellular telephone comprising machine program logic recorded thereon for:

A
allowing a user at the cellular telephone to access an interactive wagering service over a wireless communications path to obtain information on races that have not been run and for which wagers may be placed;

displaying the information on the races that have not been run and for which wagers may be placed on the cellular telephone; and

displaying interactive options on the cellular telephone that allow the user to place a wager on a given race that has not been run using the cellular telephone.

42. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for providing racing data to the cellular telephone from a transaction processing and subscription management system for display on the cellular telephone.

43. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying interactive options on the cellular telephone that provide the user with an opportunity to initiate access to the interactive wagering service.

44. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to initiate creation of a wager.

45. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to display race results.

46. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular

telephone that provides the user with an opportunity to view handicapping information on the cellular telephone.

47. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to select the racetrack for the given race.

48. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to select the given race from a plurality of races at a plurality of racetracks.

49. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to select a desired wager type for the wager.

50. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to select a horse on which to wager for the given race.

51. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying current odds for the wager on the cellular telephone in real time before the wager is placed.

52. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to select a wager amount for the wager.

53. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to create a new wager after the wager has been created.

54. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to place the wager by wirelessly sending the wager to a transaction processing and subscription management system.

55. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to delete a wager after the wager has been created.

56. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying an interactive option on the cellular telephone that provides the user with an opportunity to enter a personal identification number to ensure that the user is authorized to place the wager.

57. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded

thereon for providing the user with an opportunity to request account balance information from a totalisator in accordance with the present invention.

58. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for viewing race results for the given race on which the wager was placed.

59. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for viewing race results for the given race on which the wager was placed.

60. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving racing data from a transaction processing and subscription management system.

61. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving racing data from a transaction processing

and subscription management system, wherein the transaction processing and subscription management system receives the racing data from a racing data collection and processing system.

62. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving racing data from a transaction processing and subscription management system, wherein the transaction processing and subscription management system receives the racing data from a totalisator.

63. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving account information of the user to reflect the outcome of the wager.

64. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving account information of the user to reflect the outcome of the wager and receiving results from the wager on the cellular telephone.

65. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for providing the user with an opportunity to set a reminder for the given race with the cellular telephone.

66. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for providing the user with a reminder for the given race with the cellular telephone.

67. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for displaying a reminder for the race for the user with the cellular telephone.

68. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for providing the user with a reminder for the given race by using automatic dialing equipment to place a telephone call to the cellular telephone and providing an audio reminder message.

69. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for receiving video for the given race to the cellular telephone.

70. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for:

providing the user with an opportunity to set a reminder for the given race using the cellular telephone; and
displaying the reminder for the given race on user television equipment.

71. (New) The machine-readable medium defined in claim 41 further comprising machine program logic recorded thereon for:

providing the user with an opportunity to set a reminder for the given race using the cellular telephone; and
presenting the reminder for the given race to the user at a personal computer.
